- Clay Pavers

Uses

- Interior & Exterior Walls
- **■** Floors
- Counters

Special Features

- No Rinse
- Hides Etch Marks
- Hides Scratches

- Easy-to-Use
- Self-Repairing ■ No-Build-up
- Natural Protection
- Enhances

PRODUCT DESCRIPTION

KEEP OUT OF REACH OF CHILDREN. Limestone/Travertine Soap is a unique natural stone soap designed for cleaning and maintaining stone containing calcium. Re-create the "Old World" finish with **Limestone**/ Travertine Soap. Limestone/Travertine Soap reacts with the calcium in terrazzo, limestone, marble or concrete to produce a protective layer that helps resists wear to the surface. As the protective shield is worn away, it

will be repaired during the next cleaning cycle. Because **Limestone/Travertine Soap** reacts with calcium in the surface there is no risk of buildup. Once the surface is dry, it can be buffed with a floor machine using a white pad or polishing brush to increase the shine.

Limestone/Travertine Soap is excellent for regular maintenance and will enrich, nourish and deepen the natural color and patina of the surface.

Sample Testing

Due to the differences of each material, several inconspicuous test patches should be completed to assure maximum performance. User must determine suitability of the product for their intended use.

Protect Neighboring Surfaces

Always protect neighboring surfaces including wood, carpet, metal, landscaping and other non masonry surfaces.

EXISTING INSTALLATIONS - SURFACE PREPARATION

Surface must be dry and free of contaminant, including previously applied sealers, dirt, lime, hard water deposits, efflorescence, rust & other heavy dirt and grime.

Floor Coating/Wax Removal:

To remove existing coatings and/or waxes use Mira Strip or Finish Sealer **Stripper** per specification.

Heavy Duty Cleaning: To remove lime, hard water deposits, efflorescence, rust and other heavy dirt, grease and grime use HDAC (Heavy Duty Acidic **Cleaner) or Phosphoric Acid Cleaner** following the instructions carefully.

For a non-acid deep cleaning, use Liquid Poultice as directed.

Light Cleaning: Use **Tile & Stone Cleaner** or **Counter Kleen** as directed.

Application Instructions:

Read entire label and SDS/PDS before using.

Always dry dust mop or sweep area to be cleaned before applying **Limestone/Travertine Soap.** During the first six months, damp mop the surface with **Limestone/Travertine Soap** and water on a regular basis by mixing 1 part **Limestone/Travertine Soap** to 10 parts water. After six months, maintain area by damp mopping with a ratio of 1 part Limestone/Travertine **Soap** to 20 parts water. When the solution becomes dirty or cloudy, replace it. Do not rinse **Limestone/Travertine Soap** off the floor. Use as directed in proper solution and allow to dry.

Light buffing with a floor machine (175 - 2000 rpm) and white pad or soft brush will enhance the sheen. Allow Limestone/Travertine Soap to dry for at least 45 minutes before buffing. Limestone/Travertine Soap is also effective on counters and vertical surfaces.

Water, Stain & Slip Protection

To protect cleaned area from future soiling and staining and increase static coefficient of friction, we recommend applying the appropriate Miracle **Penetrating Sealer/Impregnator** per specification, prior to first application of Limestone/Travertine Soap.

Coverage

Coverage will vary depending on density, porosity, texture, surface absorption, weather, time solution left on surface and application methods. Used as directed, Limestone/Travertine Soap will clean from 1000 - 7,000 square feet per gallon (90 - 630 square meters per 3.785 liters).

MAINTENANCE

For ongoing maintenance instructions please refer to Miracle Sealants Care Guide. Refer to the Miracle Sealants Product Recommendation Chart for specific product recommendations.

Store **Limestone/Travertine Soap** in the original container, properly sealed and unmixed. Stored at 77° F (25° C), Limestone/Travertine Soap will have a shelf life of 12 months. Do not allow to freeze.
