

AE Lunch and Learn Program

The dedicated members of Rust-Oleum's Architect & Engineering team can provide you with the information needed to address a multitude of projects. Subjects include: resinous floor coatings, fluid applied roof coatings, high performance coatings, tile/stone sealers, primers, and more. For use at stadiums, schools, water/ waste water, restaurants, breweries, wineries, garages, and tilt-ups.

How to Treat Concrete Floors

This course discusses the assessment and repair of a concrete floor and specifies how to select a high-performance coating system based on the conditions and requirements of a construction project.

AIA COURSE IRS03A

- 1 AIA HSW/LU CE Hour

Rust Prevention 101

During this one-hour presentation, we explore the rusting process and how it relates to structural integrity, life-cycle, and safety. We review rust prevention strategies, surface, preparation, and specific coating types

AIA COURSE IRS07B

- 1 AIA HSW/LU CE Hour

We've Got You Covered: Fluid-Applied Roofing Systems

In this one-hour course, the design professional will be exposed to the impact of roof deterioration throughout the US, and they will have an opportunity to explore a more cost-effective solution that can be used immediately to give new life to aging roofs in an effort to avoid spending millions of dollars replacing them as well as be used in new construction projects to increase sustainability and longevity of roofs

AIA COURSE IRS07A

- 1 AIA HSW/LU CE Hour

Primed For Success - An Introduction to Primers

AIA COURSE: R0321

- 1 AIA HSW/LU CE Hour
