*This product contains a mildewcide to prevent the growth of mold and mildew on the paint film only.

PAINTING DIRECTIONS

PREPARATION

For new pre-primed steel, wood doors and fiberglass, simply clean the surface before painting. For best results on bare metal or wood, prime with Zinsser Bulls Eye 1-2-3® first.

For repainting a painted door, remove any loose paint and rust with sandpaper. Lightly sand glossy surfaces. Clean surface with soap and water, rinse and let dry.

Refer to product label for best painting conditions.

PAINTING

Stir thoroughly. Apply with 6-1/2" shed resistant 3/8" nap roller, premium quality 2 or 2-1/2" angled sash brush or 100% nylon or nylon/polyester brush. A high-density foam roller can also be used. Brush in the direction of the panel or grain.

For new and existing doors, we recommend painting the door off the frame to allow paint to dry completely before hanging. If painting a hanging door, do not close the door until the paint is fully dry (6 hours or more) to prevent it from sticking to the door frame.

DRY & RECOAT TIMES

Recoat after 1 hour. Paint will be dry to the touch in 45 minutes, to handle in 4-6 hours, and is fully dry in 6 hours.

CLEAN UP

Clean brush and other tools with soap and water.

COVERAGE

One quart of Rust-Oleum Door & Trim Advanced Dry Paint will cover 2 coats on each side of the door. Certain deep or bright colors may require an additional coat for complete hide.
