## Application Steps:

Using a laser printer, print image on standard printer paper.

### 1. Apply

Brush a generous amount of Photo Transfer solution onto printed side of paper.

### 2. Place

Lay image on surface printed side down. Firmly rub image onto the project. Smooth out air bubbles.

Wait 12 hours until the project is completely dry. Once dry, wet paper using a damp rag, dabbing a section at a time.

### 3. Remove

Once dry remove paper by rubbing off paper backing in a circular motion exposing transferred ink. Repeat as necessary.

### 4. Protect

For added protection, apply Photo Transfer as a top coat seal the image.

## Gloss Finish

2-in-1: Transfers & Protects  
Water-based brush-on solution

Works on wood, metal,  
glass & more!

NET WT. 8 OZ. (236mL)

Print, apply  
& transfer!

One - 8 oz  
Bottle Included

## You Will Need:

- A printout of your favorite photo
- Brush
- Rag
- Ruler

## Additional Tips & Tricks for Application:

- Image must be printed using a laser printer on standard printer paper
- For images with a lot of white space you will see your project's surface instead of a white color, as only ink will transfer
- When placing image onto your surface, press down firmly when smoothing out air bubbles to ensure the entire photo lays flat against your project's surface. A roller, ruler or credit card can also be used.
- Excess Photo Transfer can be cleaned up with soap and water.
- Rub paper backing in a circular motion to remove damp paper without harming the ink transfer.
- When using on wood, light woods will show bolder colors while darker stained woods will give a vintage look with muted color tones.
