PRODUCT APPLICATION (cont.)

APPLICATION

Apply only when air and surface temperatures are between 50-90°F (10-32°C) and humidity is below 85% to ensure proper drying. Stir thoroughly. Do not shake the can. Thinning is not required. Avoid painting in direct sunlight or on hot surfaces.

Use a high quality synthetic brush. Roller application is not recommended. Avoid excessive brushing as this will reduce film thickness and protection. Wait for the base coat to dry for at least 8 hours before applying the Clear Protective Topcoat. Use light even brush strokes to ensure even flow and the smoothest finish. Apply 1-2 even coats. Wait 2 hours between each coat.
