Equipment and Tools

- Application: Always prepare a test area prior to full application. This will indicate the time required for project completion and suitability of application.
- Application: Environmentally friendly materials are used in the production of all EnviroSHIELD™ products, making disposal simple.
- Storage and Disposal: This product does not require special treatment. When disposing of the product, follow the instructions provided on the label.

Product Usage:

- Application: This product is designed for use on painted wood, concrete, brick, and masonry surfaces. It is also effective on metal and plastic surfaces.
- Application: This product is not recommended for use on plastic or non-porous surfaces.
- Application: This product is not designed for use around electrical or gas lines.

Preparation:

- Surface Preparation: Surfaces should be clean and free of debris. In the presence of organic contaminants, use a biocide blend to prevent mold and mildew growth.
- Surface Preparation: Surfaces should be free of oil, grease, and other contaminants.

Testing Method:

- Testing Method: This product is formulated with natural rubber polymers, which provide water resistance and protection from stains, but will not neutralize cross-linked with chrome or metal oxides.
- Testing Method: This product is designed for use on painted wood, concrete, brick, and masonry surfaces. It is also effective on metal and plastic surfaces.

Safety:

- Safety: Eye protection is recommended. Apply as supplied using a spray gun. Do not shake. Do not dilute.
- Safety: Eye protection is recommended. Apply as supplied using a spray gun. Do not shake. Do not dilute.

Disposal:

- Disposal: This product does not require special treatment. When disposing of the product, follow the instructions provided on the label.
- Disposal: This product does not require special treatment. When disposing of the product, follow the instructions provided on the label.

Mold Resistant Coating:

- Mold Resistant Coating: This product is designed for use on painted wood, concrete, brick, and masonry surfaces. It is also effective on metal and plastic surfaces.
- Mold Resistant Coating: This product is designed for use on painted wood, concrete, brick, and masonry surfaces. It is also effective on metal and plastic surfaces.

Mold & Mildew Prevention:

- Mold & Mildew Prevention: This product is designed for use on painted wood, concrete, brick, and masonry surfaces. It is also effective on metal and plastic surfaces.
- Mold & Mildew Prevention: This product is designed for use on painted wood, concrete, brick, and masonry surfaces. It is also effective on metal and plastic surfaces.

Odor & Stain Blocker:

- Odor & Stain Blocker: This product is designed for use on painted wood, concrete, brick, and masonry surfaces. It is also effective on metal and plastic surfaces.
- Odor & Stain Blocker: This product is designed for use on painted wood, concrete, brick, and masonry surfaces. It is also effective on metal and plastic surfaces.

Masonry Cleaner:

- Masonry Cleaner: This product is formulated with natural rubber polymers, which provide water resistance and protection from stains, but will not neutralize cross-linked with chrome or metal oxides.
- Masonry Cleaner: This product is formulated with natural rubber polymers, which provide water resistance and protection from stains, but will not neutralize cross-linked with chrome or metal oxides.

Where to Use:

- Where to Use: This product is designed for use on painted wood, concrete, brick, and masonry surfaces. It is also effective on metal and plastic surfaces.
- Where to Use: This product is designed for use on painted wood, concrete, brick, and masonry surfaces. It is also effective on metal and plastic surfaces.
