MAGNETIC PRIMER is a chemical-bonded primer that forms a simple surface to prime that attracts iron, steel, stainless steel, aluminum, copper, and many other metals. You can spray, brush, or roll it. You can apply it to any metal surface:

- Iron, steel, stainless steel, aluminum, copper, and many other metals.
- Primed or bare metal surfaces.
- Enamel, lacquer, rust, paint, and other existing coatings.

MAGNETIC Primer is a rapid-drying primer that can be applied at any temperature from 50°F to 120°F (10°C to 49°C). It is designed for indoor and outdoor use on various substrates, including metal, stainless steel, and non-metallic surfaces such as concrete, wood, and plastic. It is available in a variety of colors and finishes, including flat, semi-gloss, and gloss. For more information, visit rustoleum.com/magnetic.

Magnetic Primer is perfect for use in automotive applications, such as painting car parts, as well as in other industries where a magnetic surface is required. It is easy to apply and dries quickly, making it ideal for production lines and workshops. It is also ideal for use in healthcare settings, such as hospitals and clinics, where a magnetic surface can be used for medical equipment and tool storage.
