DIRECTIONS

For best results use on a wet surface. Attach garden hose to back of sprayer with valve in "OFF" position. Turn on water to the hose. With valve in "RINSE" position, spray the surface and any surrounding plants or vegetation. With valve in "CLEAN" position, apply the cleaner to the surface from the top down. For best results, work in small sections and allow the product to remain on the surface for 5 to 10 minutes to penetrate. Do not allow to dry on surface. Rinse off treated surface with valve in "RINSE" position. Turn hose on full pressure for best results. Rinse surrounding areas and vegetation with water. On extremely soiled or mildewed surfaces, it may be necessary to scrub with a bristle brush, and a second application may be needed.
