PRODUCT APPLICATION

SURFACE PREPARATION

Lawn should be dry and free of all debris such as leaves and sticks prior to application. If necessary mow the lawn. Cover and mask off surrounding areas to protect from overspray. Protective clothing and gloves are recommended.

PRECAUTIONS & TEMPERATURE SAFEGUARDS

DO NOT APPLY IF RAIN IS EXPECTED WITHIN 12 HOURS OF APPLICATION. DO NOT APPLY PRODUCT IN WET, WINDY OR DUSTY CONDITIONS. Apply when air and surface temperature is between 45°F (7°C) and 100°F (38°C) for at least 3 hours after application with the relative humidity below 85%.

PRODUCT APPLICATION (cont)

RENOVATOR GRASS COLOR REFRESH will not bring dead grass back to life. Recommended use is for grass only.

APPLICATION

ONE COAT OF RENOVATOR GRASS COLOR REFRESH IS REQUIRED. Shake well before and during use. When using more than one gallon, combine all containers to ensure color consistency. Pour the product into a standard deck or garden type sprayer. Pressurize the sprayer by pumping several times. When the sprayer is pressurized properly, the product may be sprayed. Test the product in a small space prior to the application to ensure the desired color is achieved. Place the tip of the sprayer 6-10” from grass when spraying. For best results, and coverage, place the pump sprayer nozzle on the finest mist setting and spray in a circular pattern.

COVERAGE

Covers up to 350 square feet per gallon. One coat is required. Actual coverage will vary depending on grass type, age and porosity. If a darker shade is desired, two coats may be applied.

DRY TIMES

Dry times are based on 70°F and 50% relative humidity. The material will dry to the touch in 30 minutes. Allow 4-6 hours before light foot traffic and 24 hours before placing any furniture on the lawn. Cooler temperatures or higher humidity may increase dry times.

CLEAN UP

Use mild soap and water. Clean up drips or spatters with water immediately as dried coating may be difficult to remove. When project is complete, rinse out the pump sprayer with water by pressing the contents and empty out by way of the spray nozzle. Follow the equipment manufacturer’s instructions to clean the pump sprayer.

CLOGGING

If the pump sprayer nozzle becomes clogged, remove and rinse out with water. Once the nozzle is cleaned, re-attach to the pump sprayer.

STORAGE

KEEP FROM FREEZING. CLOSE CONTAINER AFTER EACH USE TO PRESERVE THE PRODUCT.

KEEP OUT OF REACH OF CHILDREN
