## TOUGH TASK REMOVER

### Directions for Use:

#### Directions: Stain Removal

Always test on an inconspicuous area first. Apply directly on area to be cleaned, and allow to penetrate briefly. Wipe off with a clean cloth or towel. For older, more difficult jobs, apply a generous amount of remover and allow to stand for a few minutes before wiping dry. For extremely tough jobs, such as removal of old, dried latex paint, scrub with a brush or scouring pad and wash off with a wet rag.

#### Directions: Pressure Washer Application

Contains anti-corrosive agents to safeguard pressure washer parts (bleach can erode O-rings). When using a pressure washer to clean painted surfaces, please be aware that water pressure alone may remove paint, or highlight existing discoloration caused by the sun's UV rays.

1. Rinse surrounding plants with water, before and after application.
2. Wet the surface to be cleaned, prior to applying the product.
3. Place detergent application siphon tube and screen filter directly into container. Open meter valve (if applicable) for maximum product flow. For reservoir machines, pour product (full strength) into pressure washer.

4. Spray at low pressure onto a wet surface.
5. On vertical surfaces, always spray from the top down.
6. Allow product to remain on the surface for 3 to 5 minutes to penetrate. Do not allow product to dry on surface.
7. Remove siphon tube from solution and rinse surface with high pressure spray thoroughly.
8. Flush siphon tube with clean water prior to storage.

#### **Directions: Carpet Cleaning & Stain Removal**

1. Safe for all carpet types, including synthetic, as well as stain resistant carpets.
2. Concentrated formula will clean six 9' x 12' (2.5m x 4.0m) carpets. Coverage may vary depending on type and condition of carpet.
3. Vacuum carpet thoroughly with home vacuum cleaner.
4. Pre-treat any stubborn spots or stains by using concentrate (in undiluted form) as a stain remover prior to cleaning carpet.
5. Add concentrate to the receiving/waste tank of the machine to reduce foam build-up.
6. Add 4 ounces of concentrate for each gallon of water in the dispensing/fill tank.
7. For heavy traffic areas or heavily soiled carpets, add 6 ounces of concentrate for each gallon of water.
8. Use hot (not boiling) or cold water according to the carpet manufacturer's cleaning directions. Read machine instructions carefully. Do not overfill.
