

Mean Green Industrial Strength USES AND DILUTION RATIOS

FOUR PARTS WATER + ONE PART MEAN GREEN = ALL PURPOSE CLEANING

The illustration above is an example a 4:1 dilution ratio. Refer to specific dilution ratios listed for the various applications. Mean Green is a powerful concentrate. It's formulated for tough jobs that other cleaners will not tackle. These dilution ratios are general recommendations. Use more or less Mean Green depending upon difficulty of task at hand.

DIP TANKS: Full strength or up to 10-1. Removes cutting oils from machinery after manufacture, degreases engines, hydraulic cylinders, and any other heavily soiled parts without environmentally harmful solvents. Very effective at removing varnishes and carbon. **Mean Green** has a very slow evaporation rate and emits no harmful fumes.

FLOOR SCRUBBERS: Dilute 40-1. Pre-spray with full strength on stains and heavily soiled areas.

WAX STRIPPER: Dilute 4oz. **Mean Green** with 8oz. hot water. Apply generously with mop to floor. Let stand to dissolve wax build-up. Use deck brush or floor scrubber

VINYL TOPS AND UPHOLSTERY: Use up to 6-1. Spray onto upholstery. Brush if needed and rinse.

OIL DISPERSANT AND RIG CLEANER: Full strength or 1-1. Mean Green is highly effective on oils as a replacement for solvents that are proven harmful to the environment. Apply **Mean Green** onto oils generously and allow to penetrate. Wipe or rinse with water.

CARPET CLEANING AND STAINS: Use 40-1 for commercial carpet steam cleaners. Use up to 8oz. to each gallon of hot water for rental machines. Pre-spray spots and stains and follow machining instructions.

SOAP SCUM: Full Strength. **Mean Green** is very effective on soap scum build-up in tubs and shower stalls. Spray **Mean Green** to evenly coat soap scum and allow to penetrate. Wipe with wet sponge and rinse.

Car and Truck Tires, Engines, Chassis, Smoke Stacks, Trailers, Truck Fuel Tanks, Painted Truck Tire Rims, Industrial Machinery and Equipment, Fiber Glass Boat Hulls: Use full strength or 1-1. **Mean Green** is most effective tire and engine cleaner available. Spray generously and evenly onto tires. Brush lightly if needed and rinse well with strong stream of water. To degrease engines, spray generously on cool engines (avoid contact with car finishes, may spot) and allow to penetrate grease. Rinse with strong stream of water. All other tough jobs, simply spray on and wipe or rinse with strong stream of water.

PRESSURE WASHING: Use up to 50-1 with metered commercial machines and rental machines. Pressure wash trailers, houses, siding, concrete and brick, restaurant hoods and many other washable surfaces.

RESTAURANTS AND FOOD PROCESSING PLANTS: Use full strength or 4-1 for tough jobs. Use 4oz. to each gallon of water for light duty cleaning. Great for removing cooking grease from equipment, walls and floors. **Mean Green** is USDA Authorized for use in Federally Inspected Meat and Poultry Plants.

LAWN AND GARDEN EQUIPMENT, SWIMMING POOLS, BARBECUE GRILLS, GARAGE FLOORS: Use full strength or up to 4-1. Spray or brush onto item to be cleaned and wipe or rinse with water.
