APPLICATION INSTRUCTIONS:

1) **SURFACE PREPARATION:** Clean all surfaces intended for application at the same time and allow them to dry completely prior to application of RECOLOR.

2) **APPLICATION:** Ensure you are in a well ventilated area and the surface intended for application is completely dry. Wearing the chemical resistant gloves, tear open the Wipe-It packet, pull out the applicator cloth and carefully coat the surface in a single wipe, from one row to the next, with a slight overlap (like mowing a lawn) until the surface is completely coated. It is not necessary to scrunch or buff the surface—doing so will lead to undesirable results and product waste.

   If streaking on the surface appears, then it is time to open the bottle of RECOLOR, re-saturate the cloth, and continue the application process. It is important to complete the surface that you started before RECOLOR dries so that the coat cures evenly. If the application cloth becomes contaminated or dry, then saturate one of the additional applicator cloths provided and continue.

   On plastic or vinyl surfaces that have high exposure to sunlight, a second coat can be applied to further seal the first coat and bring the surface up to a higher gloss level. Apply the second coat 10–15 minutes after the initial one hour cure. The surface will dry to the touch in about 1 hour and be cured completely after 24 hours. You may cover a treated surface with a tarp after the initial one hour cure to protect from rain and/or dew.

   Do not apply to hot surfaces or in direct sunlight as this may cause the surface to appear streaked. Ensure the surface is clean, dry, and cool to the touch before applying RECOLOR.

   If RECOLOR comes in contact with an unintended surface, wipe it off immediately with a dry cloth.

   If RECOLOR begins to dry on the applicator cloth, streaking may occur. Re-saturate the cloth with RECOLOR. Once the applicator cloth dries out completely, or becomes contaminated, it cannot be reused and must be discarded (see Step 3 for disposal instructions).

   Store RECOLOR in a cool, dry place, ensuring the bottle is tightly sealed.

   **KEEP OUT OF REACH OF CHILDREN.**

   **WARNING:** CONTAINS: p-CHLORO-TRIFLUOROTOLUENE.

   **FLAMMABLE LIQUID AND VAPOR. VAPOR HARMFUL:** Avoid inhalation of vapors. Use only outdoors or in well ventilated areas. If over exposed to vapors, remove to fresh air. If breathing is difficult, seek medical attention immediately. **SKIN AND EYE IRRITANT:** Wear chemical resistant gloves. In case of contact with skin, wash thoroughly with soap and water. In case of contact with eyes, hold eye open and thoroughly flush with water for at least 15 minutes. If irritation persists, seek medical attention. **FLAMMABLE:** Keep away from ignition sources. In case of ingestion, do not induce vomiting. Seek medical attention. Store in a cool, dry location. Max VOC. <150 g/L
